

CipherInterface< T >

```
classDiagram
    class CipherInterface {
        <T>
    }
    class ECB {
        <T>
    }
    class RC6 {
        <T>
    }
    CipherInterface <|-- ECB
    CipherInterface <|-- RC6
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'CipherInterface< T >'. Below it are two boxes: 'ECB< T >' on the left and 'RC6< T >' on the right. A horizontal dotted line connects the two lower boxes, with a solid vertical arrow pointing upwards from the center of this line to the bottom of the 'CipherInterface' box, indicating that both 'ECB' and 'RC6' inherit from 'CipherInterface'.

ECB< T >
